MARCH 1989

Once again the Department of Public Safety brings to you the "Uniform Crime Report" for the year of 1988. We acknowledge the effort that all law enforcement agencies throughout this state put forth to make this report concise and accurate. Their diligence makes this report possible. The staff at the Bureau of Criminal Identification compile the statistics in order to make them a useful tool for the many sectors of society who utilize the report to meet their needs. Appreciation is expressed to them.

The Uniform Crime Report program has been the best source of statistical data available for use in tracking crime trends and assisting administrators in planning and budgeting; however, the criminal justice system throughout the United States feels the report should be expanded to include other critical elements that will give administrators a better handle on criminal activity. The new program is called "Incident Based Reporting" (IBR) and will take statistics directly from crime and arrest reports generated at the local law enforcement level. We are tracking the evolution of "IBR" closely and look forward to introducing the program to Utah law enforcement when the time is appropriate.

Until then, it is our hope that this 1988 report will be of help to you and if possible will be used to help reverse rising crime trends.

The staff at the Bureau of Criminal Identification stand ready to answer questions regarding any part of this report.

D. Douglas Bodero
Commissioner of Public Safety

TABLE OF CONTENTS

1. Utah State Uniform Crime Annual Report, 1988
   - A. 1988 Summary Analysis 1
   - B. Acknowledgments 2
   - C. Introduction 3

   - A. Arrest by Offense 30
   - B. Total Liquor and Drug Arrest 31
   - C. Total Arrest 31
   - D. Total Arrest by Agency 33

8. Uniform Crime Ten Year Trend 34

1988 SUMMARY ANALYSIS

- There were 94,277 Crime Index Offenses reported during 1988, a .1% increase over 1987.
- The largest decrease in reported crime was murder with a 12.9% decrease followed by burglary with a 6.4% decrease.
- Arson showed an increase of 10.8% along with rape up 6.2% and robbery up 2.7%. Motor vehicle theft was up 3.8%.
- 92,566 arrests were made in the state which is a 1% increase over 1987, of these 35.6% involved juveniles.
- The value of property stolen amounted to $44,119,242. 29% was recovered.
- The theft of motor vehicles accounted for a substantial value of property loss, amounting to $12,839,794. Value of motor vehicles recovered was $9,000,439.
- Residential burglaries accounted for 67% of all burglaries reported. 34% of these were committed at night.

ACKNOWLEDGEMENTS

The Departmental Staff extends its appreciation to all law enforcement agencies of Utah who contributed to the Uniform Crime Reporting program. Their consistant, accurate reports are the basis of this document.

Special appreciation is extended to the Federal Bureau of Investigation Uniform Crime Reporting Section for the assistance provided to the Utah UCR program.

INTRODUCTION

The existence of crime in our state is a concern not only of law enforcement but of our society as a whole. This report presents an overview of criminal activity in Utah in 1988. It is important to keep this report in perspective. It does not represent the overall crime rate in Utah. The report reflects the F.B.I.'s crime index of murder, forcible rape, robbery, aggravated assault, motor vehicle theft, burglary, larceny theft and arson.

These index crimes are reported by all states giving the nation as a whole a reliable set of statistics to show crime trends in the United States.

INCIDENT BASED REPORTING

Since the establishment of the Uniform Crime Reporting (UCR) Program in 1930, the volume, diversity, and complexity of crime steadily increased while the UCR Program remained virtually unchanged. Recognizing the need to address crime's growing challenge, the law enforcement community in the late 1970s called for a thorough study of the UCR Program with the objective of revising the Program to meet law enforcement's needs into the 21st Century. NIBRS is the result of that study, and its purpose is to satisfy those needs.

In order to ensure that it fulfills its purpose, NIBRS has adopted the following goals:

1. To enhance the quantity, quality, and timeliness of crime statistical data collected by the law enforcement community.
2. To improve the methodology used for compiling, analyzing, auditing, and publishing the collected crime data.

The State of Utah through its Bureau of Criminal Identification and with assistance from the Commission on Criminal and Juvenile Justice (CCJJ) is taking steps to implement Incident based Reporting (IBR) in this state. Federal grant seed monies will help develop computer software whereby IBR information gathered at the local level of law enforcement will be transmitted through automation to the state level for compilation and dissemination.

BCI looks forward to working with local agencies in the implementation of this project.

CRIME FACTORS

In order to provide a meaningful statistical profile of crime within the State of Utah, each law enforcement agency must provide the Uniform Crime Reporting Unit with data that depicts specific crimes that are occurring within their jurisdiction. There is a need for compatibility with the National Uniform Crime Reporting System and, therefore, categories of offense classifications used within the state are identical with those of the National System. This results in equitable conclusions being drawn from the data submitted.

Reported Part I offenses and arrests are recorded in the municipality where they occurred regardless of the outside investigative agency which may investigate, arrest, or otherwise dispose of the case.

The factors which influence crime rates are dependent upon characteristics of the community. When attempting to interpret the crime statistics presented herein, one should be aware of the social structure and factors that lead to or cause criminal behavior.

Crime rates in this publication are based on the stable population of the municipality. Fluctuating seasonal population figures are too inaccurate to be used as a measurement for determining crime rates. Municipalities with high seasonal populations may indicate a higher crime rate per one thousand than may be normal for a municipality their size. This would also be indicated in municipalities that experience high population increases due to special events or commuters.

Set forth below are some of the factors which, by type and volume, will affect the crime that occurs from place to place.

- Density and size of the community population and the metropolitan areas of which it is a part.
- Composition of the population with reference particularly to age, sex, and race.
- Economic status, including job availability and mores of the population.
- Relative stability of population, including commuter, seasonal, and other transient types.
- Climate, including seasonal weather conditions.
- Cultural conditions such as educational, recreational, and religious characteristics.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphasis of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional and probational).
- Crime reporting practices of the general citizenry.
- Attitudes of the public toward crime reporting.
- The administrative and investigative efficiency of the local law enforcement agency, including degree of adherence to crime reporting standards.
- Cooperation of adjoining and overlapping police agencies.

OFFENSE DEFINITIONS

Criminal Homicide:

a. Murder and Non-negligent Manslaughter:

The willful, non-negligent killing of one person by another. Excludes attempts or assaults to kill (classified as aggravated assault), suicide, and accidental deaths. The killing of a felon by a private citizen or the killing of a felon by a police officer in the line of duty are considered justifiable homicides by UCR are are excluded from this count.

b. Negligent Manslaughter:

The killing of another person through gross negligence. Traffic fatalities are not counted.

Rape:

The carnal knowledge of a female through the use of force or the threat of force. Assaults to commit forcible rape are also included; however, statutory rape (without force) is not counted in this category.

Robbery:

The taking or attempting to take anything of value from the care, custody, or control of a person by force or threat of force and/or by putting the victim in fear.

Aggravated Assault:

The unlawful attack by one person upon another for the purpose of inflicting severe bodily injury usually accompanied by the use of a weapon or other means likely to produce death or serious bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed. Attacks using personal weapons (part of the attacker's body) must result in serious personal injury to be classified as aggravated assault. Simple assaults are excluded from this count.

Burglary:

The unlawful entry of a "structure" to commit a felony or theft. The use of force to gain entry is not required to classify the crime as burglary. Burglary is broken down into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

A "structure" is considered to include the following, but not limited to: dwelling houses, apartments, out buildings, public buildings, offices, factories, barns, cabins, etc.

Larceny:

The unlawful taking or stealing of property or articles without the use of force, violence, or fraud. This includes crimes such as shoplifting, purse snatching, pocket picking, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc. This crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is excluded from this category inasmuch as it is separate Part I offense.

Motor Vehicle Theft:

The unlawful taking or stealing of a motor vehicle, including attempts. This definition excludes taking for temporary use by those persons having lawful access to the vehicle.

UCR defines a motor vehicle as a self-propelled vehicle that runs on the ground and not on rails. Examples include automobiles, trucks, buses, motorcycles, mopeds, snowmobiles, etc. Thefts of farm and/or construction equipment, boats, and airplanes are not included in this category but are counted as larcenies.

Arson:

The willful or malicious burning of property with or without the intent to defraud. Includes attempts.

CRIME RATES FOR INDEX OFFENSES

The Uniform Crime Reporting Program provides data for police executives to measure local problems. To facilitate this function, the local data must be converted to terms of rates and percentages.

CRIME RATES

One of the most meaningful crime statistics is the crime rate. This rate is the number of Part 1 offenses per 1,000 inhabitants. This rate can be calculated regardless of the number of inhabitants in any city, town, or county.

In computing crime rates by county, population estimates for individual counties were prepared using current census reports.

No attempt has been made to incorporate either transient population or other factors which contribute to the ratio and type of crime in a given area. Any effort to make comparisons of crime rates between one area and another should recognize these population changes and varying environmental factors.

CRIME RATES PER COUNTY

Ten Year Trend

THE UTAH UNIFORM CRIME REPORTING PROGRAM

In 1978 Utah joined a growing number of states that have adopted Uniform Crime Report as the official statewide Crime Report. The Department of Public Safety has accepted the responsibility to collect, validate and tabulate Uniform Crime Reports from all reporting jurisdictions in Utah.

The fundamental objective of the Uniform Crime Reporting Program is to produce a reliable set of criminal statistics for use in law enforcement, administration, operation, and management. This compiled data is also intended for the use of other professionals and scholars who have an interest in the crime problem, at the same time this information is important as a reference source for the public as an indication of the crime factor in our society.
